

Bully-be-Gone

With all this technology, bullies should be a thing of the past now

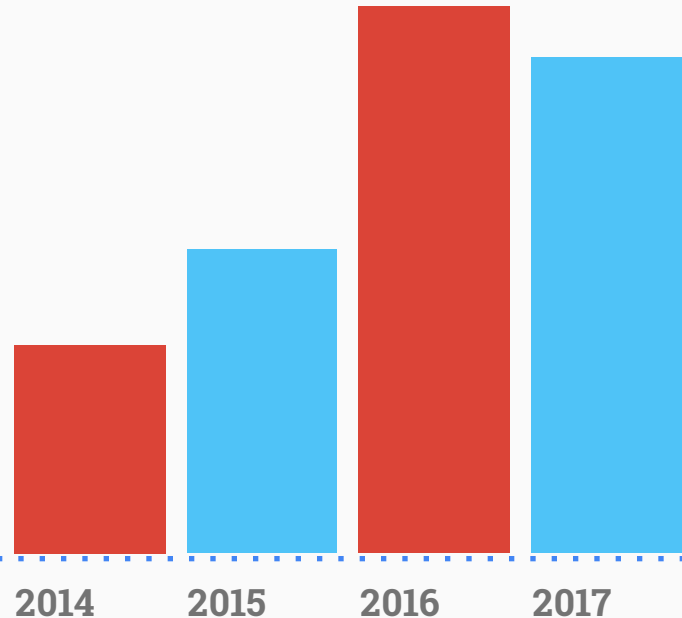

Mission statement:
Help people get rid
of harassment,
bullying and angry
messages

The background image shows a laptop screen with a dark overlay. On the screen, there is a line graph with a blue line and a pie chart with a green slice. The text is overlaid on the left side of the screen.

The problem

In 2017, out of 4,500 school going US population, 74% of girls and 71% of boys faced bullying at some point.

This value has been increasing over the past couple of years.

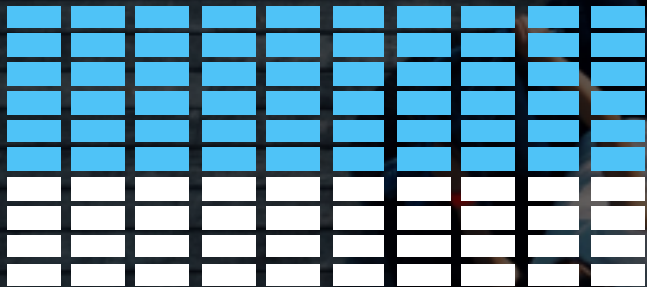

The solution

Can we use existing technologies to battle this bullying epidemic?

Features

An anti-bullying
extension accompanied
by a parent portal

Parents have complete
awareness of the
bullying messages their
kids receive

How it works

Step 1

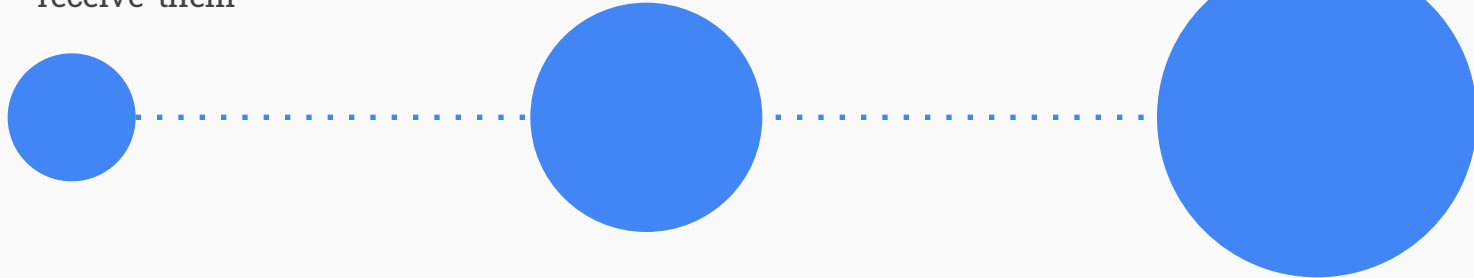

A chrome web-extension listens to your Facebook messages as you receive them

Step 2

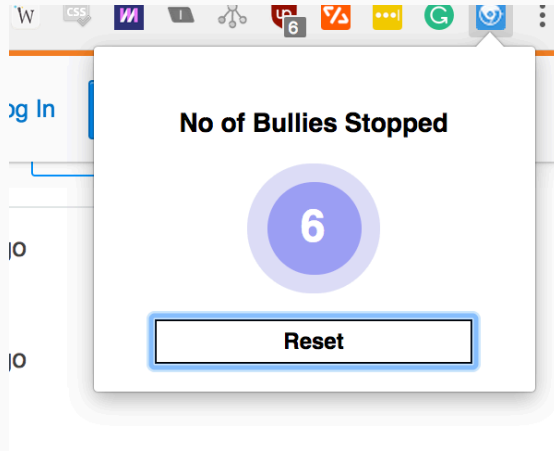

It checks whether a message is an angry/bully message by using the IBM API.

Step 3

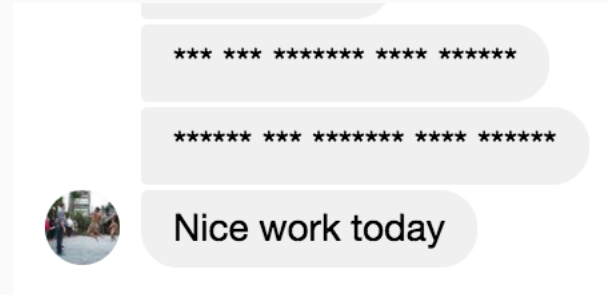

Based on the result from the previous step, the extension censors the message and sends a logging request to our server

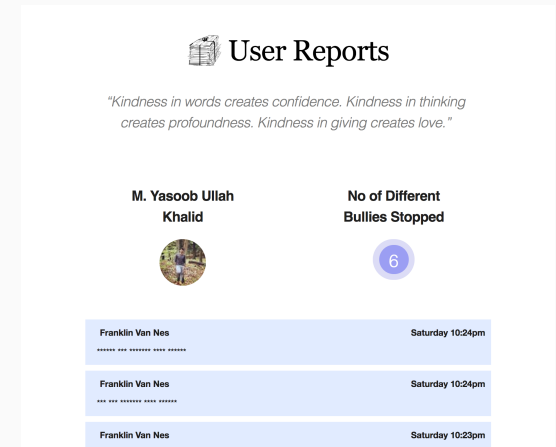

Different Screens

1. Bully Text is Detected

2. Bully Text is Blocked

3. Data is saved for parents

Thank You

Any Questions?

This is still a work-in-progress with a couple of hickups but it works for most part. I would be more than happy to give a live demo.
